

## Mesopotamia Wikispace Project Evaluation (Part 1)

Log in to our class Mesopotamia Newspaper wikispace. Take some time to view and read five other students' wikispace pages on our site. You will look for items from the list below. You will comment about their pages and grade their work. The authors will not see your evaluation of their work, only the teacher will see your sheet. Your comments should be reasonable and show your understanding of the expectation of the project (rubric), the unit material (Social Studies facts), and the technology (use of wikispaces).

Page Name	Comments: What did you like? And/or what should this team done differently?	Grade (1-4)

After you complete the chart above, answer the questions on the back to evaluate the overall project. Students should write thoughtful responses because your ideas will be used for planning in future classroom projects.

## **Mesopotamia Wikispace Project Evaluation (Part 2)**

1. Had you used wikispaces prior to this project? If so, what had you used it for?
2. Do you prefer to use multimedia technology like Wikispaces, Power Point, Dreamweaver, Photo Story, or Movie Maker to complete class projects? If yes, give some ideas about how you would like your teachers to offer these options (ie, book reactions, etc.) If no, explain why.
3. Look at the list of technology in Question 2 and circle those that you know how to use on your own.
4. Identify the best part(s) of using wikispaces for this project and give details that explain why it was positive?
5. Identify the worst part(s) of using wikispaces for this project and give details that explain why it was negative?
